# THE PROBLEM

## *War on Talent*

Recruitment is essential for all hospitality companies. However, in most hospitality companies online recruitment & employment communication are underestimated and limited knowledge and insight, which influence this actually has on the company and the industry, is available. This is also logical because it is almost impossible to keep up-to-date with knowledge and expertise in most companies.

The investment required for online recruitment and employment communication, not only time and money, but also knowledge, experience and specialization can not be calculated. It remains a large challenge and the costs and time involved to attract and recruit the right people are enormous.

Luckily, now there is a way to solve this problem together.

*Together we are strong.*

Corporate websites, job boards, trade magazines, social media and other forms of "recruitment tools" are used but there are still talks about the "War on Talent" and the difficulties of "finding" the right people at the right moment.

Right now is the time to built and use together a platform where the industry is in control and sets the course: welcome to Hospitables! We've built something unique for the benefit of the industry. Not at the expense of the industry: remember platforms such as Booking.com, Uber and AirBnB.

That's why we present, together with you, the job board for employers and employees in the hospitality industry worldwide: [Hospitables.com](https://www.hospitables.com).
